PCLaw Fixes
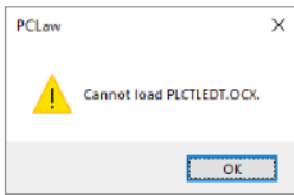

There is a common error that seem to occur often.

PCLAW RUNS FROM ████ - Steps should be run on the server

Suggested Action

Take the following steps:

1. Close all open programs.
2. Click on the **Start** button (or the **Windows** icon) in the lower left hand corner or your screen.
3. Click on **Programs** (or **All Programs**).
   Note: Depending the version of Windows 10, you may need to click on **All apps** or skip to step 4.
4. Click on **LexisNexis® PCLaw**.
5. Click on **Register OLE Components**.
6. Make sure all the boxes are checked and click **OK**.
   Note: If you run into errors, you may not have sufficient privileges to register the components or the components being registered are not installed. You may need to login as an administrator.
7. Restart **PCLaw** after the Utility finishes.

If this doesn't work the link has further steps.
